July 11, 2017

Dear Contractors,

The City of Arvada's Building Department would like to notify you that the adoption of the 2015 International Codes date has been changed to September 1, 2017; we will be enforcing the adoption of the 2015 International Codes on that date. During this time we will be streamlining the format of the Ordinance for easier reading and updating all of our documents and literature. A draft will be made available to view on our website May 1, 2017. Significant changes will include the adoption of the 2015 Energy Code Provisions and the requirement to protect unfinished basement floors in residential construction.

The Building Department will continue to accept plans, until that time, under the 2009 International Codes. All applications received on or after September 1, 2017 will be reviewed for compliance to the 2015 codes. Please note that the adopted Electrical Code is regulated by the State and will remain NFPA 70/NEC 2014.

If you have any questions, please contact the Building Department at (720) 898-7620 option 1 or by email at buildingpermits@arvada.org.

Respectfully,

Brita Van Horne
Chief Building Official
buildingpermits@arvada.org
