<input type="checkbox"/>	Landscaping has not commenced. A contract for the value of the materials and work is attached .

Date of Inspection	Time of Inspection

 Signature of Licensed Landscape Architect

Timing of Inspection

Arvada may for any reason audit a landscape inspection and complete an independent inspection. Results of that inspection may require additional landscape construction, an escrow or an escrow adjustment by the applicant. Due to the difficult evaluating and verifying landscape construction during winter months, no landscape inspections will be accepted during the months of December, January and February. The contractor will receive no credit for completed or partially completed landscape construction.

Landscape Escrow

If landscape construction is partially completed, or is yet to start construction, the Landscape Architect must provide a contract indicating the value of the incomplete landscaping; this will serve as the basis for a contractor's required or escrow amount as established by the development agreement. If there is no effective development agreement for the site, the required escrow amount will be set at 150% of the contract value, except during a drought, during which time the escrow may be reduced to 110% of the contract value for incomplete turf or seeded areas, trees, shrubs, mulch, edger, and weed barrier; a factor of 150% will be applied to all other landscape elements. Escrowed funds will be released upon submission of Certificate of Landscape Completion for 100% of the landscape design for the site.

Contractor must upload completed form into the permit at arvadapermits.org
