-----------------------	---

*Combination permit defined.* A permit that is issued to the general contractor or the primary contractor and includes the subcontractor's valuation and fees as a part of the permit. Only a combination permit shall be issued where more than one category of work, such as building, electrical, plumbing, or HVAC, is involved.

Exception: The building official may allow separate permits to be issued when a general contractor is not required for the scope of work involved, or when the building official finds good cause.

*Separate commercial permits.* When work is done by a subcontractor and is not part of a combination permit, the valuation used to determine the permit fee will be based on the actual contract value of the work being done. If the work is part of a combination permit and the subcontractor's contract value is unknown, the value will be assumed to be ten (10) percent of the overall combination permit valuation for each contractor.

*Residential combination permits for single family detached or attached homes.* When a combination permit is issued for a new single-family dwelling unit, the fee assessed for the electrical, heating, and plumbing subcontractors shall be equal to thirty (30) percent of the calculated building permit fee.
