

# How to use an RRFB (Rectangular Rapid Flashing Beacon)

## 1 Pedestrians:

- Push the button to activate the flashing lights.
- The flashing lights help bring attention to you, but do not require a driver to stop.
- Once you have safely entered the crosswalk, drivers are required by law to yield to you.

## 2 Drivers:

- When the lights are flashing, a person is preparing to enter the crosswalk.
- You are required by law to yield to a person in the crosswalk.
- Remain behind the triangular yield marks until there are no people in the crosswalk.

## 3 Bicyclists:

- You have the same rights and responsibilities on the road as drivers.
- When people are in the crosswalk, remain behind the triangular yield marks.
