

Ralston Road Phase One

(Upham to Yukon Streets)

Construction Starting First Quarter of 2020

PROJECT DESCRIPTION

As part of the City's ongoing efforts to provide sustainable infrastructure for our growing city, we are undertaking a project to widen and improve the Ralston Road corridor between Upham and Yukon Streets (Phase One) followed by the segment between Yukon and Garrison Streets (Phase Two).

Ralston Road is an arterial roadway and a major east-west corridor for Arvada's transportation network, serving 23,000 vehicle trips each day. It provides connectivity to major north-south corridors including three State Highways (SH-95/Sheridan Blvd., SH-121/Wadsworth Blvd., and SH-72/Ward Road).

PROJECT SCOPE

- Reconstruct pavement on Ralston Road
- Relocate utilities
- Widen traffic lanes
- Install new curb and gutter on both sides of the roadway
- Install 8' detached or 10' attached sidewalks
- Reconstruct traffic signal at Olde Wadsworth Blvd and Ralston Road

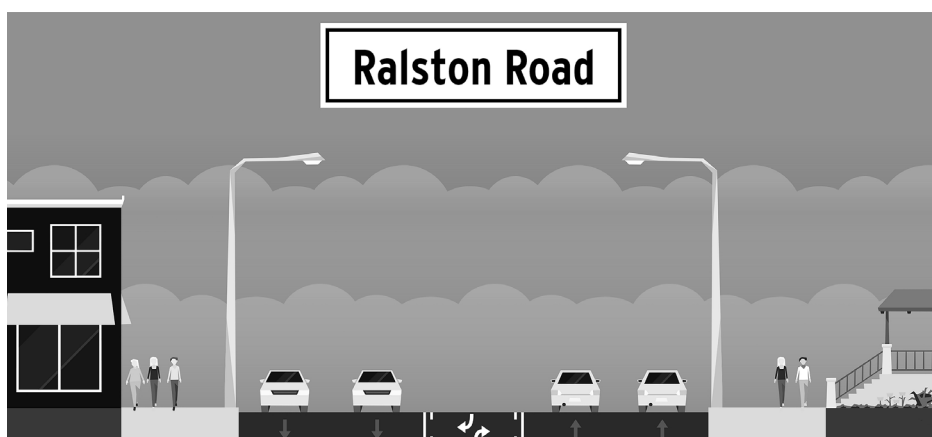

WHAT TO EXPECT DURING CONSTRUCTION

- One eastbound and one westbound traffic lane along Ralston Road will be open
- Access to businesses will be maintained during normal business hours.
- Traffic control devices will be set up in advance of construction to notify motorists of lane closures, detours and recommend alternate routes
- Construction activity will typically take place between 7 AM and 3 PM on weekdays

PROJECT SCHEDULE

The contractor is expected to begin placing traffic control devices around February 17, 2020. Construction will take approximately one year.
